Content and structure area

| | |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Scope and content | <p>In 1977 the Development Committee decided, as an experiment, to hold meetings of the deputies to the Committee members in advance of the Committee meetings, in order to prepare for the discussions in the full Committee. After four meetings the experiment was abandoned.</p> <p>The records consist of agendas and information packets for the four meetings, verbatim transcripts, and numbered documents. Topics covered are the same as those of the Development Committee for the period, including the role of multilateral development institutions, review of the work program of the Committee, a report of the Working Group on access to capital markets, and a Mexican proposal for a long-term recycling facility.</p> |
| Accruals | Accruals are not expected. |
| System of arrangement | Records are arranged in two sub-series: meeting packets with the verbatim transcript chronologically by meeting; numbered documents by year and thereunder by number. |

Conditions of access and use area

| | |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| Conditions governing access | Records are subject to review by the Development Committee. Researchers should be aware that the review process may be lengthy. |
